EDUCATION

GLA University, Mathura, UP

2023 - 2027

B.Tech - Computer Science and Engineering Specialization in AI and Analytics - CGPA - 8.59

EXPERIENCE

Project Intern – IIT Bombay 🔗

May 2025 – July 2025

- Designed and implemented a high-availability microservices architecture using Django REST Framework, ensuring seamless integration with React.js front-end elements for real-time data visualization.
- Implemented microservices architecture fetching road speeds every 15 minutes via Google Maps API, storing in PostgreSQL, and exposing data via REST APIs.
- Focused on debugging, testing, and monitoring of backend services to ensure high reliability.
- Tech:** Python, Django REST Framework, Djoser, React.js, MySQL, Azure, Google Maps API, REST APIs

Open Source Contribution - Open Climate Fix 🔗

Dec 2024 – March 2025

- Developed reusable and efficient code for core Python repositories, implementing modular Pytest suites and optimizing Docker setups to ensure high-availability and performant backend services.
- Improved CI/CD workflows, Docker setups, and overall contributor experience.
- Tech:** Python, FastAPI, PostgreSQL, Docker, GitHub Actions (CI/CD), Pytest, REST APIs

TECHNICAL SKILLS

Languages: Python, Django, Django REST Framework (DRF), FastAPI, SQL, javascript.

GenAI/LLM: OpenAI API, Azure AI Studio, RAG Applications, Prompt Engineering, Vector Data Handling, Machine Learning, Deep Learning, Scikit-Learn, NumPy, Pandas, SciPy, Seaborn,

Backend & Cloud: Object-Oriented Programming (OOP), Microservices, PostgreSQL, Docker, CI/CD (GitHub Actions), Redis/Celery.

Frontend Integrationk: React.js, Streamlit, HTML, CSS, RESTful API Design.

PROJECTS

Plot Wizard (Data Visualizer & ML/DL Learning Platform) 🔗

January 2025

- Built an interactive data visualization and ML learning platform enabling real-time data analysis.
- Integrated Azure AI and OpenAI APIs to generate code snippets and insights for users.
- Automated PDF analytics reports for users and included an AI chatbot trained on ML/DL concepts.
- Tech:** Streamlit, Python, NumPy, Pandas, Azure AI, OpenAI, scikit-learn, SciPy, Matplotlib, Seaborn

GPS Toll-based System Simulation 🔗

May 2024 – July 2024

- Developed a GPS-based toll system using Python, Django, and SQLite to simulate real-time toll calculation and invoicing, with GPS input via Arduino + GSM modules.
- Implemented OAuth2 login, penalty rules, and asynchronous billing workflows using Celery & Redis in a microservices-inspired architecture.
- Tech:** Python, Django, SQLite, Celery, Redis, Docker, HTML, CSS, Javascript, NumPy, Pandas, REST APIs

CERTIFICATIONS

- Microsoft Certified: AI-900 (Azure AI Fundamentals) - validates foundational AI / ML understanding
- Microsoft Certified: AZ-900 (Azure Fundamentals) - Cloud Computing Principles
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

EXTRACURRICULAR

Microsoft Learn Student Ambassadors 🔗

- Conducted a hands-on workshop for 150+ attendees on building PDF-interacting chatbots using Azure AI Studio. Integrated backend logic via Python, GitHub Actions, CI/CD workflows, and Streamlit.

Google Cloud Facilitator Program 🔗

- Guided 600+ students through GCP concepts and hands-on labs, equipping them with practical cloud skills and foundational DevOps workflows.
